Purchase Agreement – Schedule A

Products and Pricing

Pricing Policy

Each skin substitute product distributed by Seller is priced at a fixed rate per square centimeter (sq cm) by product line, as set forth in the rate schedule below. **The applicable rate is uniform across all sizes of a given product and applies to all Purchasers.**

Payment Terms: Net sixty (60) days from Use Date, as defined in Section 3 of the Purchase Agreement.

Calculation — sheet products: Invoice Price = Length (cm) × Width (cm) × the applicable per-sq-cm rate for that product line. Custom sizes are priced at the same per-sq-cm rate as the corresponding product line.

Calculation — non-sheet (flowable) products (Interfyl®): Invoice Price = milligrams (mg) per unit × the applicable per-mg rate. The per-mg rate is set at 40% of the applicable 100% reimbursement rate per unit of non-sheet skin substitute.

Rate Schedule by Product Line

Interfyl® pricing basis: Interfyl is a non-sheet (flowable) skin substitute billed under HCPCS Q4171 per 1 mg. The per-mg rate is set at 40% of the applicable 100% reimbursement rate per unit of non-sheet skin substitute (\$127.14 + wage index per MAC locality; $40\% \times \$127.14 = \50.856 , rounded to \$50.86 / mg). Invoice Price = milligrams (mg) per unit $\times$ \$50.86. Milligram content per SKU is per the manufacturer's specifications; coverage (sq cm) is shown for reference only and is not a pricing input. The national base rate is shown here; locality-specific rates apply per the CMS MAC schedule and will be substituted per locality.

Prices are stated in U.S. dollars and are subject to change by Seller pursuant to Section 1 of the Purchase Agreement. The per-sq-cm rate for each product line applies uniformly across all sizes of that product, including custom sizes, and applies to all Purchasers.
